RSVP optional: apple@greenmap.org

Sandy's storm waters surged into Manhattan, heralding a new 21st century reality.

Bike with us to explore both the aftermath and resiliency solutions generated on the LES, East Village and East River Park that respond to the realities of climate change.

This Lower East Ride includes discussion of practical responses that increase livability as well as long term planning for a more resilient NYC with **Wendy Brawer of Green Map System** and **Bethany Bingham, Catalyst Coordinator for Greenway Activities at Partnerships for Parks**. Guest speakers include **Charles Komanoff of Komanoff Energy Associates** and **Ray Sage of Alpha Bee City Honey**.

This thought provoking ride is part of **Climate Week NYC** and the **10 Days of Climate Action!** The ride will be stopping at Bike Share stations along the way.

Participants can take home copies of the printed Lower East Ride Green Map in English or Spanish. This map can be explored interactively or downloaded at [facebook.com/lower.east.ride](https://www.facebook.com/lower.east.ride) for a self-guided tour.

The series of Lower East Rides is co-sponsored by **Green Map NYC** and **Time's Up**. Download more maps at GreenMapNYC.org and news about the park at [facebook.com/East-River-Park](https://www.facebook.com/East-River-Park).
